## Parent Companies | 2017

A European Comparison

The AGN European Region conducts annual surveys of corporate tax, parent companies, self-employed, value added tax (VAT), salary and social security and inheritance taxes. These surveys have been produced for a number of years and provide interesting comparisons from year to year and from country to country and give an insight into trends.

**Introduction:** Parent companies are used to hold participations in group companies, to collect dividends and make capital gains from the sale of subsidiaries in the most tax efficient way.

**The objective** of the survey of parent company jurisdictions is to compare and contrast the conditions for the exemption of dividends and capital gains and to try to identify the most useful and flexible jurisdiction to place the parent company. The tax calculations are based on a standard profit and loss account and balance sheet with subsidiaries in France, Germany, USA and Switzerland.

**Countries Covered:** The 2017 survey covers 22 countries, which is made up of 16 EU countries plus Isle of Man, Norway, Switzerland, Turkey and Ukraine.

■ Net Cash Received
 ■ Corporate Tax
 ■ Withholding Tax on Dividend
 ■ Withholding Tax on Interest
